PRAGATI KUMAR

Software Engineer | Applied AI | Enterprise Integrations & Agent Systems

pragati.kumar2019@gmail.com • linkedin.com/in/pragatikr • github.com/pragati1698

PROFILE

Software engineer with 4+ years across Java backend engineering, Python automation, distributed test infrastructure, and enterprise AI applications. Experience turning stakeholder needs into integrated workflows; built a Kubernetes test platform supporting 200 parallel sessions. M.S. in Computer Science.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL | Backend: Spring MVC, Spring Boot, REST APIs, Hibernate

Cloud & Systems: Azure, AWS, Docker, Kubernetes, CI/CD, Git | AI: Copilot Studio, LLM APIs, Azure AI Foundry

Data & Automation: SQL Server, PostgreSQL, Pandas, Power Automate, Selenium, Appium, Power BI

PROFESSIONAL EXPERIENCE

Software Engineering & Applied AI | Connecticut Department of Transportation | Feb 2024–Present

Official title: IT Analyst 2 · Planning, Technology & Innovation

- Built an enterprise AI work-intake agent using Copilot Studio, SharePoint and Power Automate to capture requests and route them to support teams.
- Led technical design and prototyping for AI initiatives, translating stakeholder requirements into architecture and platform choices.
- Built Python/Selenium automation to collect Power BI workspace metadata into SQL Server and improve reporting asset visibility.
- Developed a Python NLP pipeline for 1,000+ survey responses, organizing themes and sentiment for leadership analysis.

Quality Engineer | Crestron Electronics | Jan–Dec 2023

- Designed a distributed Kubernetes/Selenium test platform supporting 200 parallel sessions and reducing a regression workflow from 6 hours to 3 minutes.
- Built automation for firmware validation and API reliability tests across product lines.

Software Engineer | Larsen & Toubro Infotech (The Hartford) | Jan–Dec 2021

- Developed Java backend components with Spring MVC and Hibernate for enterprise insurance workflows.
- Built and maintained mobile test automation frameworks using Appium for Android and iOS.

SELECTED PROJECT

Agent Hands | github.com/pragati1698/agent-hands

Built a Python/Playwright computer-use prototype separating live LLM workflow discovery from deterministic replay, with typed capabilities, code-owned action policy, checkpoint verification, human handoff, and sanitized evidence.

EDUCATION & CREDENTIALS

M.S. Computer Science — Stevens Institute of Technology (2023), GPA 3.9/4.0 • B.E. Computer Science — Savitribai Phule Pune University (2020)

AWS Certified Cloud Practitioner • Microsoft Copilot Architecture Bootcamp (2026)
